## BRING GLAMOUR BACK

Today's fashion is all about comfort. Over-sized sweaters and leggings are everyone's go-to outfits. And while there's nothing wrong with that, where is the glitz and glam? There was a time when men and women alike used fashion to make a statement. Tailored suits embodied professionalism and intelligence, while high heels and pencil skirts gave the perfect balance of power, sensuality, and feminine grace.

So what deterred us from this sophisticated sense of style? The misconception that this fashion-forward attire is more expensive, time consuming, and can even be painful. Ladies, you've heard the mantra "no pain, no gain" when it comes to wearing those Christian Louboutins or fitting into that body-con dress. Well, your friends here at Tara Fine Jewelry Company are happy to tell you to throw those negative thoughts out the window! Glamour is not about placing beauty over comfort. *Glamour fashion is all about you!* What works best for your body? What matches your sense of style? What makes you feel bold, powerful, and sexy?

Fashion houses around the world are featuring dapper designs that are sure to add a touch of pizzazz to our everyday lives. Swiss-made timepieces always make a good first impression, whether you're looking to land an interview or wanting to give someone the gift of a lifetime. Beautiful Diamonds from your favorite designer lines can make a 20th Wedding Anniversary feel like a first date. Don't settle for the ordinary; experience the magic of extraordinary and bring glamour back to our everyday lives. So rock your Sunday best and make a fashion statement. Don't be afraid to flaunt a striking sense of style at the office. No matter the occasion or the latest fashion trends, *true glamour will never be out-of-date!*
